

SPRING PLANTING GUIDE

Seed Starting

Seed starting recipe - Searles seed raising mix 1/3, 1/3 perlite. 1/3 vermiculite. keep moist , soak in seaweed before planting out

Bed prep

At Terra Tribe, we believe in sustainable farming practices, including building no-dig beds using layers of hay, mill mud, and mulch. The key to successful bed building is allowing time for the worms and microbes to work their magic by breaking down the layers and creating nutrient-rich soil.

Cover crop

Spring/summer cover crops - cow pea/buckwheat/millet
autumn/winter - rye/oats/clover/dakion radish
clay soils - daikon radish / buckwheat
'nematodes / disease - mustard
.ts - soil health, biodiversity, pest and disease management

Companion Planting

Companion planting can help attract beneficial insects that control pests, reducing the need for pesticides. Certain plant combinations can improve soil health by fixing nitrogen and enhancing nutrient uptake.

amendments

Seaweed/kelp - Nutritech Solutions
tidal wave - red soil Organics
Morpheus - red soil Organics
